

This is one tough container that will not rust, chip, crack, peel or dent. The liners have built in handles to ease with removal when emptying. Optional lock or latch. A convex top stops the rain from pooling. The ribs sides help to discourage the posting of bills or illegal advertisements. The hinged door has a plastic spine for a long lasting maintenance free container.

Features

- Ergonomically correct, designed with the operator in mind
- Available as a Trash Bin, a Recycling Container or a Modular Multi-stream Unit
- Optional side mounting cylinder ashtray
- Optional advertising panels for the front and sides

- › Dimensions: 24" W x 24" D x 46" H

Phoenix Double Recycling

- › Capacity: 96 Gal.
- › Weight: 140lbs
- › Dimensions: 48" W x 24" D x 46" H

SUPERIOR DESIGN FEATURES

Ergonomic Design Benefits of the Phoenix

- 1 **Front Door Access** - reduces the height a load must be lifted, thereby minimizing the risk of back strain
- 2 **Slam Lock** - key is required to open but not to close
- 3 **Recessed Handle** - allows the door to be opened without reaching into the waste area
- 4 **Dual Liner Design** - divides the weight load an operator must handle at one time
- 5 **Recessed Handle Grips** - allows the operator to grip the liners with ease and ensures that their hands never come in contact with waste / recyclables
- 6 **Slide & Pivot System** - the liners are designed to slide up a ramp and pivot outward to further reduce back strain

Insert Options

*Recycling /
Waste Combinations*

Dual Recycling

The insert options allow the Phoenix to transform from a single to a multi-stream unit, ideal for recycling materials or to function as a waste / recycling mix.

Logo Options

Embossment

Lexan Panel

Logos allow customers to further personalize their unit and also act as another means of promotion. Logos may be embossed directly into each unit, or screened on to a lexan panel.

Advertising Panels

The advertising panels, which are available for all sides of the Phoenix, create a potential revenue stream for the unit's owner. This will continue generating revenue long after the Phoenix has paid for itself.

Community Message Center

The interchangeable community message center will allow the owner of this container to notify the public of important information or simply provide the opportunity to thank them for "pitching in".

Note:

Waste Wise Products Inc. is committed to producing environmentally friendly products. The Phoenix further reinforces our dedication to being an environmentally responsible organization, producing sustainable products for the present and future.
