

Before assembly, please make sure all fasteners are included.

32 - #12 x 3" Flat Head Phillips Screw

Also needed for this assembly will be the following materials:

1 - #3 Phillips Drive Bit

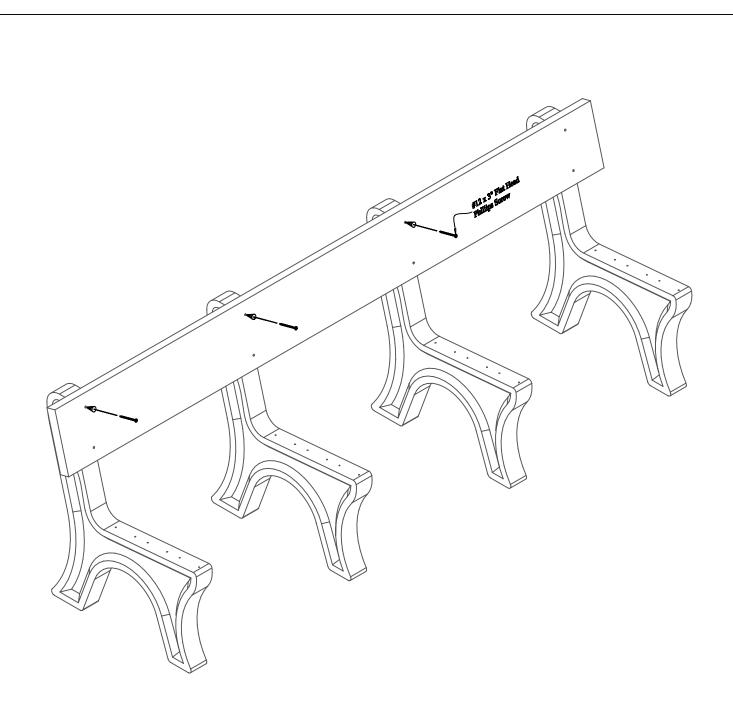

Fig #1:

In order to make the assembly of this Landmark Bench easier while going through the assembly process the board positions are numbered and will be referenced in later steps.

Step #1:

Stand (1) One bench end upright and place (1) One back bench board on position 1 being sure to align the pre-drilled holes to the pilot holes in the bench end. After the holes are properly aligned, fasten with (1) One #12 x 3" Flat Head Phillips Screw in the top pre-drilled hole of the back bench board.

Note: Do not tighten screw completely. This will be done in a later step.

Step #2:

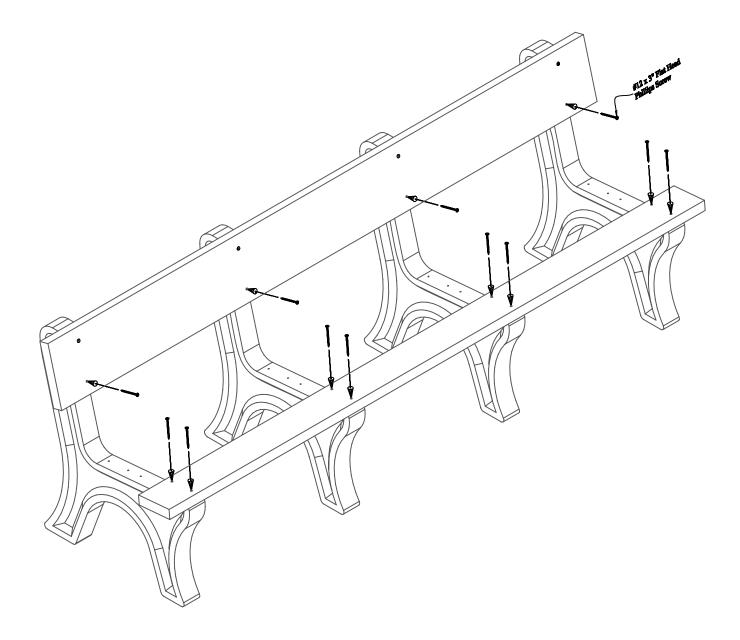

Stand the other (3) Three bench ends upright, one at a time, and place the back bench board already attached to the first bench end, on position 1 being sure to align the pre-drilled holes with the pilot holes in the bench end. After the holes are properly aligned, fasten with (1) One $\#12 \times 3"$ Flat Head Phillips Screw in the top pre-drilled hole of the back bench board.

Note: Do not tighten screws completely. This will be done in a later step.

Step #3:

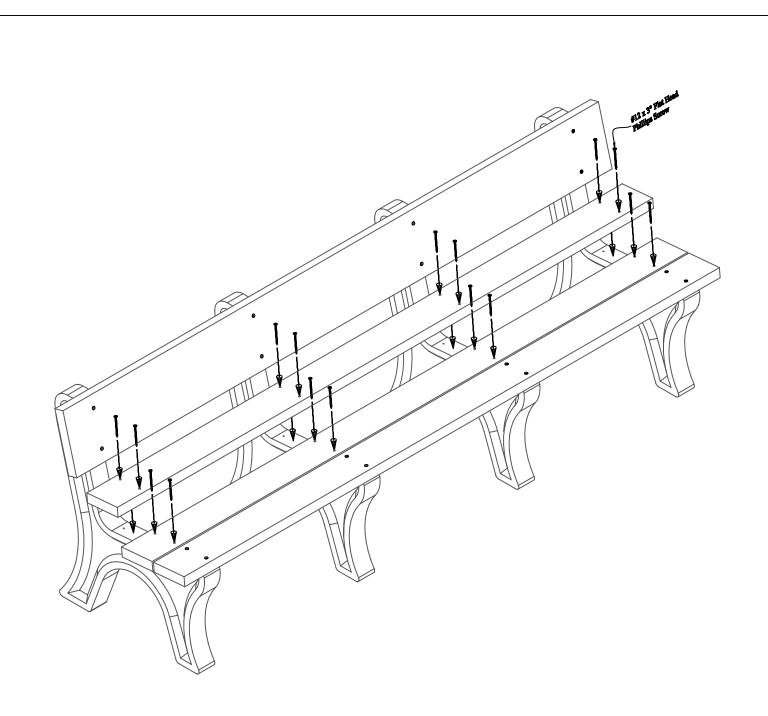

Align the bottom pre-drilled holes on the back bench board to the pilot holes on the bench end. After the holes are properly aligned, fasten with (1) One $#12 \times 3''$ Flat Head Phillips Screw per hole.

Note: Be sure to tighten screws completely after this step.

Step #4:

Place (1) One seat bench board on position 4. Repeat Steps 1 - 3 to attach. Use (1) One #12 x 3" Flat Head Phillips Screw per hole to fasten.

Step #5:

Repeat Steps 1 - 3 to attach seat bench boards on positions 2 & 3. Use (1) One #12 x 3" Flat Head Phillips Screw per hole to fasten.
