

XL Vented Lift Lid/Solid Lift Lid

Have Your Organics Program 'Lift Off'!

Take the ick factor out of centralized organic collection with the new Vented Lift Lid. Not only will you not have to see your collection contents but with our optional vented lid you won't have to smell them either. Thanks to an activated charcoal filter, odors will be absorbed and unwanted smells eliminated. The new Lift Lid is easy to use from either the side or front of the lift feature and will stand alone once up, leaving both hands free to scrape plates. When in the closed position the lid will seal off container contents. Not collecting compost yet? The solid option is perfect for collecting all types of recyclables and waste, keeping them out of sight and lid sealed. Designed to fit our Waste Watcher XL.

ADDITIONAL FEATURES:

- Lid seals off container contents
- Free standing when lifted
- Lift from both front and side
- Solid and Vented options available
- Vented lid eliminates odors
