

Designed with 97% recycled HDPE plastic, the TXZ is completely recyclable, making it a proper cradle-to-cradle recycling station that's ideal for any business environmental initiative or LEED certification.

The TXZ Series Recycling Station withstands heavy use in any high-traffic outdoor area. This receptacle features a sturdy design & ergonomic front deposit openings. The TXZ's waste streams can be easily emptied by facility staff through its front service doors. Avoid the accumulation of dirt and debris; this receptacle's slanted roof design self-cleans with rainfall.

If you're looking to change the number of streams without replacing your entire recycling bin, the TXZ can be configured as a single, double, triple or quad stream recycling station.

- Cradle-to-cradle; 97% HDPE recycled content made from milk jugs and plastic bags
- Front service, front deposit
- Rigid liners included
- Upper graphic panel for more visible waste streams
- Drainage holes inside prevent the buildup of liquid from spills, leaks, or weather
- Interchangeable openings to ensure better participation or to add another waste stream
- Complete with one integrated 23.25" x 5.25" Quick-Change Label per compartment
- Each compartment's capacity can be split 50/50 or 1/3 & 2/3

COLOR OPTIONS

	Adobe Clay		Marine Blue
	Dove Gray		Raven Black
